## **LED ACCESSORIES – PRODUCT DESCRIPTION**

### **AQO OUTDOOR TRANSFORMER**

- The Aquatran AQO outdoor transformer is the latest in fully weatherproof low-voltage power solutions.
- The AQO transformer is perfect for outdoor lighting installations where performance, durability and aesthetics are all important.
- The number of transformers to be used depends on either connecting a single switch to light an area or having separate switching of separate light areas. (E.g. One transformer 12 V 100 VA covers a medium size garden on one single switch.)

### **TINNED COPPER GARDEN CABLE**

- Tinned Copper garden cable is used for connecting LED garden lighting systems.
- This cable is especially designed for outdoors and is not subject to Copper Cancer due to the Copper being tinned.

### **CABLE CONNECTION KIT**

- The blue cable connectors (Twisties) are used for connecting the LED lights easily to the garden cable with “one twist”.
- The cut-to-size glued heatshrink is used to make the light connections water proof. This is recommended for any outdoor lighting works.
