

**LED
Bollard Light**

Ideal for marking driveways, lighting pathways, decking and garden areas

<p>Electrical 0.25 W Voltage: 12 V DC Current: 20 – 22 mA Power: 0.24 W – 0.26 W (at 12V DC)</p>	<p>Dimensions Head Length: 65 mm Stem Length: 250 mm Stem Diameter: 25 mm Spike Length: 190 mm</p>
<p>Finishes Stainless steel stem and spike Copper stem</p>	<p>Variations Stem only 150 mm stem length</p>
<p>Specifications Fully sealed and waterproof to IP68 Cable length: 1 meter (standard) 2 meters (optional)</p>	<p>LED Colors White Warm White Amber Green Red Blue</p>

Very Low Ultra Violet Emission

Will not overtly attract insects or fade fabric

Low Maintenance and lower installation costs

No globes to change, rated operational time of up to 50,000 hrs (15 years)
Less transformers and smaller cables are used

Energy Efficient

Extremely low power consumption
Up to 90 % less than conventional Tungsten Halogen lighting

Cool Operation

Very low levels of radiated heat from fittings make them ideal for long-term installation within pathways, timber decking and garden areas. Safe for children, plants, pets and wildlife.

No Mercury

No Mercury in light fitting or LED's
